Oil leak 2002 ford windstar

The contact owns a 2003 Ford Windstar. The contact stated that while driving 2 mph, transmission fluid leaked from the vehicle onto the ground. The vehicle was diagnosed at carriage Ford dealer located in clarksville, indiana where it was determined that there was a fractured transmission casing in the vehicle.

Transmission Fluid Leaking Problems of the 2003 Ford Windstar

The upper intake manifold gaskets and isolators (the bolts that hold the manifold down) leak and cause the p0171 and p0174. The reason they leak is due to a missing baffle in the front valve cover which allows some oil into the upper intake which swells the gaskets and wears them. The manifold gaskets and valve cover should be replaced.
