An electronic cigarette is a handheld battery-powered vaporizer that simulates smoking by providing some of the behavioral aspects of smoking, including the hand-to-mouth action of smoking, but without combusting tobacco. Using an e-cigarette is known as "vaping" and the user is referred to as a "vaper." Instead of cigarette smoke, the user inhales an aerosol, commonly called vapor.

Thereby, a simplified formula may be obtained as follows: Re = 68459 * V * L Where V is the airspeed in m/sec and L the wing chord in meters. The Reynolds number is therefore dependent on the weather conditions, the wing chord and the airspeed. The Re increases as the airspeed, the air density and the wing chord increases.
