The V-2 (German: Vergeltungswaffe 2, "Retribution Weapon 2"), with the technical name Aggregat 4 (A4), was the world's first long-range guided ballistic missile. The missile, powered by a liquid-propellant rocket engine, was developed during the Second World War in Germany as a "vengeance weapon" and assigned to attack Allied cities as retaliation for the Allied bombings against German cities.

History Early history. The University of Cape Town was founded in 1829 as the South African College, a high school for boys. The college had a small tertiary-education facility, introduced in 1874 that grew substantially after 1880, when the discovery of gold and diamonds in the north - and the resulting demand for skills in mining - gave it the financial boost it needed to grow.

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.
