GPS with dead reckoning is a way for a global positioning system to keep track of an individual's automobile after a satellite signal has been lost. The feature is available on many high-end GPS models for automobiles. GPS with dead reckoning works by still being able to monitor a vehicle's speed and course of direction, but is somewhat less accurate than true satellite guidance.

## Read PDF Dead Reckoning The Art Of Forensic Detection

The 10 case studies in this book illustrate the powers of observation exercised in reading the signs, identifying them as clues, and reasoning from them to the best explanation. For investigators, as well as forensic pathologists, coroners, prosecutors, and defense attorneys, Dead Reckoning: The Art of Forensic Detection stresses the importance of trusting your own observations even in the wake of apparently contradictory evidence. --Jacket.
