Chapter Review. The respiratory system is responsible for obtaining oxygen and getting rid of carbon dioxide, and aiding in speech production and in sensing odors. From a functional perspective, the respiratory system can be divided into two major areas: the conducting zone and the respiratory zone.

22.1 Organs and Structures of the Respiratory System ...

The organs of upper respiratory tract include the following. • Nose • Mouth • Pharynx • Epiglottis • Larynx • Trachea. In the passage of respiratory system, air enters through the nostrils that enter into the trachea through pharynx and larynx. The air is filtered, moistened and warmed before entering into the lower respiratory organs.
