With well over 10,000 users of OpenFOAM, that's less than € 25 per user per year. Compare that to some single-user licences of commercial CFD software that are 1000 times more expensive ! OpenFOAM cannot be funded through individual donations since fewer than 1% of people generally donate to something that they can otherwise obtain for free.

OpenCFD is pleased to announce the December 2019 release of OpenFOAM® v1912. This release extends OpenFOAM-v1906 features across many areas of the code. The new functionality represents development sponsored by OpenCFD's customers, internally funded developments, and integration of features and changes from the OpenFOAM community.. OpenFOAM is distributed by OpenCFD under the GPL license as:

OpenCFD Release OpenFOAM® v1912

HELIX-OS was created by ENGYS to facilitate the usage of standard OpenFOAM by removing the long and complex manual text inputs required by the utilities and solvers in this code. The GUI provides a fully interactive, easy-to-use environment to perform all pre-processing tasks in the CFD process, including meshing, case definition and solver execution.

Hello! Recently I followed the instructions of OpenFoam for Windows to install OpenFoam 8 and Xming. Then I ran the tutorial case of cavity under Ubuntu 18.01LT in Windows 10. It ran fine, but I found it difficult to follow the tutorial because the GUI of ParaView is apparently different than what is shown in OpenFoam user guide.

[OpenFOAM.org] ParaView GUI different than described by ...
